

AkzoNobel

Tomorrow's Answers Today

25 years celebration of Kromasil

AkzoNobel is pleased to announce its 25 years of Kromasil, the high performance chromatographic media based on state-of-the-art spherical silica for analytical and industrial HPLC applications. Initially sold for the purification of insulin, Kromasil is now the premium choice for pharmaceuticals and API purifications worldwide for its outstanding mechanical and chemical stability, consistent batch-to-batch reproducibility and extraordinary selectivity.

Mattias Bengtsson, Manager Global Marketing and Sales, said, *"It is remarkable the number of milestones we have been through since we first embarked with Kromasil, with pharmaceutical manufacturers trusting our HPLC brand in every corner of the world. Kromasil continues to provide peace of mind to those working in the drug industry due to our reliable delivery of outstanding, consistent, reproducible silica based material every single time."*

In order to keep up with the latest scientific advances in the industry, Kromasil is available in a wide range of normal-phase, reversed-phase, supercritical fluid chromatographic materials and chiral applications.

The moment you adopt our Kromasil High Performance Concept, you join thousands of chromatographers who share a common goal: to achieve better separations when analyzing or isolating pharmaceuticals or other substances.

Not only will you benefit from our patented silica technology, but you gain a strong partner with a reliable track record in the field of silica products. For the past 70 years, we have pioneered new types of silica. Our long experience in the field of silica chemistry is the secret behind the development of Kromasil, and the success of our Separation Products group. Kromasil is available in bulk and in high-pressure slurry-packed columns. The development, production and marketing of Kromasil are ISO 9001 certified.

Kromasil is a brand of AkzoNobel, the largest global paint and coatings company and a major producer of specialty chemicals with headquarters in Amsterdam, the Netherlands. With 55 000 people in more than 80 countries around the world, we are committed to sustainability, excellence and delivering Tomorrow's Answers Today™.
