

## Distribution of Kromasil® Columns.

Separation Products, a sector within Eka Chemicals AB, is implementing a new strategy by strengthening its distribution and sales channels for Kromasil® analytical products.

We are currently selecting the best network of distributors selling Kromasil® original columns, and we will work much closer with these companies. By implementing this way of working we will be able to provide the highest level of service to our analytical customers.

In order to secure the overall performance of Kromasil® columns packed by independent column packers, we are also working closer to a selected number of companies packing our Kromasil® analytical phases.

All these activities will ensure the availability of high quality Kromasil® columns.

Authorized distributors of original Kromasil® columns are shown on our website: [www.kromasil.com](http://www.kromasil.com)
